REPORT ON FLEA MARKETS OR SALES CHECKED

Poultry to be tested for pullorum typhoid are: exotic chickens, upland birds (chickens, pheasants, pea fowl, and backyard chickens). Must be identified with a leg band, wing band, or tattoo. Exemptions are those from a certified free NPIP flock or 90-day certificate test for pullorum typhoid. Water fowl need not test for pullorum typhoid unless they originate from out of state. Parrots, cockatiels, parakeets, and other psittacine birds need no test for pullorum typhoid.

NAME OF SALE _____

Address _____

SEND HOME.

LARGE OR REGULAR FLEA MARKETS SHOULD BE CHECKED AT LEAST TWICE
A MONTH

Return to Heath Harris, Field Supervisor

Coreone Bulk Data Spreadsheet

Instructions for each column can be found by hovering your mouse over the red triangle in the top right corner of the cell containing the columns label.

[illegible]

Coreone Bulk Data Spreadsheet Instructions

This tool will allow you enter your herd-level data in this spreadsheet then upload it into the SCS database. Unfortunately, this tool does not contain the same data-quality checks that the SCS interface has. Therefore, you will need to be careful entering your data to ensure its quality. This spreadsheet may be updated at any time without prior notification. If this is the case, the data in the old spreadsheets may not be able to be uploaded to the SCS database. **Please obtain a new copy of the spreadsheet regularly, perferably before each use.**

This spreadsheet should contain information for only one herd. If you must track multiple herds, please use a different spreadsheet. The uploader will only add in records that were added since the last upload. If you correct data in this spreadsheet, those corrections will not be made in the SCS database. You must correct data through the SCS interface.

There are three columns (A-C) provided for tag information. Each column contains a label which is actually a drop down list (see cells highlighted in dark green). Please choose a tag type label for each column and only enter that tag type in that column. You will only be able to enter at most three tag types for the herd.

The uploader expect a certain format for age. This can be entered as: 1) a number of months followed by the letter M (e.g. "18M"). 2) a number of years followed by the letter Y (e.g. "3Y"), or 3) a specific date of birth in mm/dd/yyyy format (e.g. "03/17/2000").

The cells for Sex and Species contain drop down lists. Please choose a value from this list.

The uploader requires a code for breed. Given that these codes are not obvious, an optional Breed Lookup Assistant is provided to auto-complete the Breed Code field. You may enter the Breed Code 1) directly by typing the appropriate code in the cell or 2) choosing the breed name from the drop down list in the Breed Lookup Assistant. If you type a value directly in a Breed Code cell or delete the contents of a Breed Code cell, the Breed Lookup Assistant will no longer work for that record. If you want to copy a Breed Code to additional records, you much copy the cell of interest and then Paste the value into the recipient cells. To do this, select the cell you want to copy and right click with the mouse. Select Copy from the menu. Then select the cells that you want to copy this value into. Once again, right click to bring up the menu and select the paste values under Paste. Paste values is the button denoted with 123. Please note that the uploader does not consider the Breed Lookup Assistant when submitting your data. Therefore, you must have a Breed Code populated for the records where you want a breed recored in the SCS database.

Coreone Bulk Data Spreadsheet

Tag Types

Tag Types

(Short Code populates the lookup. Sort by Short Code)

<u>Short Code</u>	<u>Description</u>
AIN	AIN tag (840 visual or RFID)
AMID	American ID
BAR	Barcode/Temp ID
BRND	Brand
BT	Backtag
EN	Earnotch number
ET	PIN/LID tag w/animal no
ETWON	PIN/LID - tag w/o animal no
IMP	Implant (RFID)
MGT	Management/Owner ID tag
N840RFID	Non-840 RFID
NAME	PIN/LID - name of animal
NOTag	No ID
NUES8	NUES tag (8 characters)
NUES9	NUES tag (9 characters)
OFORID	Official foreign ID
OTH	Other ID (not official)
REG	Registration number/breed registry
RSSS	RSSS Tag
SGFLID	Sheep/goat - flock ID tag
SGFLMEAT	Sheep/goat - flock ID tag - MEAT
SGSMEAT	Sheep/goat - serial tag - MEAT
SGST	Sheep/goat - serial tag - plastic
SGSTM	Sheep/goat - serial tag - metal
TATFL	Tattoo - flock ID/PIN/LID
TATOTOFF	Tattoo - other official
TATREG	Tattoo - registry
TATVAC	Tattoo - vaccination

Sex Codes

(Sort by Description)

Description

- Female
- Gender unknown/unspecified
- Male
- Neutered Female
- Neutered Male
- True Hermaphrodite

Species Code

(Short Code populates the lookup. Sort by Short Code)

<u>Short Code</u>	<u>Description</u>
